

### ATPL Instruments Typical Exam Question 11

The altimeter has not been set to the correct subscale setting. To see the correction required, refer to the diagram below:

$$\begin{aligned} \text{Height above TDZE} &= 1070' \text{ (true altitude)} - 1040' \text{ (TDZE)} \\ &= 30 \text{ feet} \end{aligned}$$

The correct answer is b)
